GREETINGS--1929

It is with great pleasure that I once more send you my Annual List of Dahlias and Gladioli ☞ I take this opportunity of expressing to you my thanks for your liberal support in the past ☞ I have enjoyed reading the large number of letters received telling of wonderful success many of my customers have had during the past season with both the tubers and plants sent them ☞ My Motto is

“A Square Deal to All”

The reproduction on the cover of this catalogue is
ANDREAS HOFER

an imported variety and one of the most beautiful dahlias it has been my
pleasure to grow.

This basket won the Silver Cup for “best basket”
at the Boston Show of 1927

GENERAL INFORMATION

Terms. Cash with order or in advance of shipment. All retail orders are delivered prepaid.

Time of Shipment. Please specify the time you wish your order shipped, otherwise it will be sent at proper planting time.

Guarantee. I WARRANT ALL STOCK sent out by me to be true to name, and will replace any that may prove otherwise. Also to arrive in good growing condition. All stock sent out before March 20th is sent at buyer's risk. Although we take every precaution, they are not guaranteed against freezing. All prices given are subject to stock being unsold.

GREEN PLANTS. I make a specialty of growing Green Plants which will give fine results if given proper care, and are less liable to become diseased than tubers. Green Plants should be planted quite deep, four to five inches. The past season my customers have had fine results from the plants I sent them. We grow good plants and pack them right and guarantee safe delivery.

I will ship plants any time after May 15th, but recommend from May 25th to June 20th, as the best time, in most localities.

This list cancels all previous prices. Write your name and address plainly, and address all mail to

CULTIVATION OF DAHLIAS

Dahlias are easily grown, requiring no special soil or treatment to bring them to perfection. They love an open, sunny situation, but also succeed in partial shade.

Prepare the soil thoroughly by digging 12 to 18 inches deep in the Fall, and then again in the Spring before planting.

If the soil is poor, work in some well-rotted manure in the Fall and apply artificial fertilizer in the Spring—100 pounds to 1000 square feet.

Dig holes 3 or even 4 feet apart and about 6 inches deep; drive a stout stake in each hole and lay the tuber down flat with the crown toward the stake and cover with 2 or 3 inches of soil, leaving the balance of the hole to be filled up later, after the plant comes up.

Plant any time between April 15th and June 15th, the latter date being the best for exhibition flowers.

When the plants have made their third set of leaves, the top should be pinched out, to make them branch. Allow only one plant to each stake.

The most important thing from now on is hoeing and cultivating until the buds appear; this should be done at least every week and after every rain. After the buds appear the ground should be mulched with rotted manure if possible, and a thorough watering should be given whenever the plants require it.

Disbudding the side buds, leaving only the terminal bud to develop, will bring larger blossoms.

After the plants have been blackened with the first frost they should be carefully dug, allowed to dry for a few hours, and stored in a dry cellar or basement and covered with dry sand or soil to keep them from shriveling.

Divide the tubers in the Spring, after the eyes show plainly, being careful that each tuber has a piece of the crown attached with an eye, cover them again and keep dry and cool until planted.

My New 1929 Introductions

A. O. KENNY. (Darling). Decorative. Large flowers of perfect form and great depth, carried on good stems. Color a rich bronze buff shade of one tone, but with the centre tinted with bronze. Never on any dahlia have we seen more gold dust on the petals than on this variety. Plants grow medium height and are very flowering, in a class by itself. This dahlia was placed on the Honor Roll of The American Home Magazine December, 1928. Plants only, \$7.50 each.

RISING MARS. (Simmons). A hybrid Cactus that for five years has been winning awards at the New England Dahlia Society shows. It has won seven first prizes, two silver medals, and the Darling Cup. In December, 1928, it was placed on the honor roll of The American Home Magazine. An abundant bloomer, early and late. Natural flowers with a uniform size of nine inches. Its color given by Ridge-way's chart as Pomegranate Purple. In the sunlight the blooms have a three tone effect. Never burns in the sun or sheds its petals. Can always be depended upon for blooms and a tight center. The plant stands five feet with dark green leaves and needs no pruning. The strong stems are long and slender. For the first time this five year old seedling is offered for sale. The tubers offered are all field grown from tubers. Tubers, \$10.00 net. Plants, \$5.00.

EMILY H. DUNBAR. (Crompton) Decorative irregular type. Color picric yellow. Very attractive color. Never fades or opens center. Carried well above the foliage, every flower is perfectly good and needs no disbuding. A profuse bloomer. The foliage is dark, leathery green, free from insect attacks. As a cut flower keeps remarkably well. A vase of it at Brockton Fair kept five days and then was real good. Flowers are uniform in size, $6\frac{1}{2}$ to 8 inches, and depth 4 inches; the flower habit is good also. Makes a great show in the garden. A wonderful variety for basket and vase work. Tubers are field grown. Get this one. Price, Tubers \$10.00. Plants, \$5.00.

MRS. R. CROMPTON. (Crompton) Decorative, deep double petal type; the color is very difficult to explain—a real fascinating blend of cream and salmon; the tips of the petals are deeper, almost orange and the colors are even more beautiful as the flower ages. The flower is 8 inches and over; center never opens. This dahlia has extra good stems and is a prolific bloomer; it is fine, especially so, for vase or basket work. People who saw it at the Brockton Show of 1928 declared its form and color to be most attractive. Owing to pressure of growers I am offering it sooner than I intended. Stock limited. Tubers, \$10.00 Net. Plants, \$5.00 Net.

The Following Are Some of the Choicest 1929 Introductions from Other Growers, the Descriptions Are the Originators—Any of These New Novelties Should Be an Acquisition to Any Garden, and Well Worth Your Trial.

KATHLEEN NORRIS. (F. & M.) We believe this to be the greatest pink decorative dahlia in commerce today. Color a true rose-pink, later deepening to mallow pink, but paler in the young central petals. A bloom of gigantic proportions; petals broad and overlapping with twisted ends; full, tight center. The first two leaves on the straight, stiff stem are from twelve to fourteen inches from the flower; a great bloomer and an excellent keeper. Has been awarded the highest prizes wherever exhibited the past season, also the Garden and Home Builder Achievement Medal at the exhibition of the Dahlia Society of New Jersey; also at the A. D. S. Show in New York. Plants only, \$7.50 net.

COQUETTE. (F. & M.) In this most robust and beautiful decorative dahlia we have a much desired combination of red and gold. Face of petals of velvety musketeer red, blending with gold and shading to a golden sunset color at points; back of petals gold. Thick, fluffy flower, composed of many curled and twisted petals, which give the impression of a glowing sunset. An exhibition flower of great beauty. Flower at least twelve inches above the first pair of leaves; stem rigid, foliage dark green and leathery, therefore insect proof. Free bloomer. Tubers, \$10.00. Plants, \$5.00.

- MRS. EDWARD W. WINSOR.** (F. & M.) An immense exhibition type decorative, composed of many narrow petals which are serrated at the points giving a fluffy appearance; color Rosalia or a golden old rose; flower held high above dark green, leathery foliage. Plant has tall habit of growth, free bloomer and stem excellent. Awarded Certificate of Merit by the Dahlia Society of New Jersey in 1926. Tubers, \$10.00. Plants, \$5.00.
- FLORENCE KLEIN.** (F. & M.) An exhibition decorative of a gorgeous salmon-orange, a very deep, full centered dahlia. Flowers can be field grown from seven to nine inches; stem is black, stiff and straight, holding the flower high above the dark green foliage. Very free bloomer. Plants grow to medium height. A beauty for either the garden or exhibition table on account of its brilliant coloring and good keeping qualities. Tubers, \$10.00. Plants, \$5.00.
- LAVENDER GEM.** (F. & M.) Here we have another lavender, but entirely different from Mrs. I. de Ver Warner, a pure lavender, not orchid color. A very thick decorative with broad petals terminating in curled points, center very tight and full, one of the first in the field to bloom and plants still laden when frost came. Stems is long and rigid, foliage dark green and leathery. Excellent habit of growth. Tubers, \$7.50. Plants, \$3.75.
- SANHICAN'S BEAUTY.** (F. & M.) It is unusual to find the same texture of petal that we get in a rose but this beautiful dahlia reminds one of the coloring found in the Mme. Edward Herriot rose. An exhibition sized decorative with evenly placed rounding petals. Excellent for cutting on account of its long, rigid stem and gorgeous coloring. Free bloomer. Tubers, \$7.50. Plants, \$3.75.
- SANHICAN'S QUEEN.** (F. & M.) In the field one instinctively walks to this beautiful decorative dahlia because of its unusual coloring which is almost impossible to describe. We call it Honeydew, it is a blending of Apricot with a faint brushing of carmine rose deepening towards the tight center. Flower is similar in shape to the old favorite Judge Marean and can be grown in open field from seven to nine inches. Plant has excellent habit of growth and of medium height. - WHITE EMPRESS.** (Jost) Decorative. No doubt the best white (decorative) to date. Very free, on long stiff stems. Winner Darnell Cup at A. D. S. Show at New York for the best keeper. When better known it will be the outstanding white decorative. Stock scarce and limited. Plants only, \$5.00.
- DR. WEBB.** (H. C.) (Clohan) One of the most satisfactory dahlias in every way. No work to take care of it and at the same time plenty of large blooms 8 to 10 inches without forcing on stems stiff and straight and any length desired up to three feet. A seedling of Ambassador with all its good qualities. Petals are long and wider than its parent; a much deeper and richer color, which I would describe as golden amber. The blooms are of fine formation, very deep and has never shown an open center. The plant is a vigorous grower, attaining a height of six feet. Foliage light green, healthy, and has been immune to attacks of leaf hoppers. Plants only, \$5.00.

ADDA PATTERSON. One of the best white Hybrid Cactus Dahlias to date. The flowers are pure white, and average 8 to 9 inches in diameter. The plant grows tall and the blossoms are held aloft on long stiff stems. Habit of plant is fine and flowers keep good when cut. Tubers, \$2.50. Plants, \$1.75.

ANDREAS HOFER. An imported variety of much merit. This is one of the most beautiful dahlias I have had the pleasure of growing; it has been a prize winner wherever exhibited. It won at the Boston Dahlia Show for best basket, and it had plenty of competition. Color is a glowing light pink, with a salmon-rose suffusion. Cactus in form, the beautiful blossoms are held erect on long, strong, upright stems. This wonderful novelty is recommended for all purposes. Tubers, \$2.50. Plants, \$1.25.

CIGARETTE. This dahlia is best described as creamy white, heavily edged orange, but no two flowers are exactly alike, the petals are long and narrow and inclined to roll; bloom is large and of good substance. Solid color flowers are scarce on bushes of this variety, but when they occur, are of pure orange. Tubers, \$1.50. Plants, \$1.00.

DOROTHY DIX. (Bessie Boston) An immense blossom of silvery pink of distinct incurved formation. Petals roll very evenly. Stem is perfect, long and stiff. Plants grow tall and sturdily and produce big flowers early and late. Centre is always closed. A big bunch of Dorothy Dix picked the middle of November, had excellent stems, closed centers, beautiful color and large size, and yet the bushes were among the first to blossom. This is one of the largest hybrid cactus we have ever grown and will be found splendid for exhibition and delightful for cutting. We cheerfully recommend it, for despite its enormous size, it has every good quality. Tubers, \$10.00. Plants, \$5.00.

"EDNA FERBER". An Exhibition Hybrid Cactus with an extremely fine stiff stem. Color a glistening coral shading to old gold at the base of petals. One of the first flowers to attract attention both in the field and on the exhibition table. Petals curled and twisted, making a very full flower. Medium to tall habit of growth, foliage dark green and thick. Has won innumerable "FIRSTS" everywhere this year (1927). Tubers, each \$5.00. Plants, each \$2.50.

EAGLE ROCK JEWEL. (Broomall) This was considered the outstanding new dahlia of California origin. The color is cream overlaid cameo pink and the large flowers are borne on strong stiff stems. Will be in great demand. Tubers, \$7.50. Plants, \$3.75.

ELSIE DANIELS. Color of this wonderful dahlia is a pale violet orchid shade on the outer petals, center white, making a magnificent combination of colors. Stems are long and stiff and hold the very large flowers above the foliage; one of the finest novelties. Tubers, \$1.00. Plants, \$1.00.

FAIRHAVEN GOLD. This dahlia has great depth, as well as large size, and is produced freely on long, stiff stems. A medium, low grower. Color a pure glistening gold, beautiful formation, mentioned in the Garden and Home Builder Dahlia "Roll of Honor", 1927. Stock limited. Tubers, \$7.50. Plants, \$3.50.

FORT MONMOUTH. (Kemp) One of the giants of the dahlia world. The predominating color is a rich crimson maroon, with shading of blueish violet at tips of petals. The flowers are well formed of true H. C. type, of immense size, frequently attaining to full 13 inches in diameter, and are borne on long stiff stems high above the foliage, and look you right in the face. Does not burn, and is a splendid keeper, both on the plant and when cut. Very prolific bloomer, from early to late, and is no uncommon thing to see as many as five and six immense blooms on a plant at a time. Plants are a strong, vigorous grower, attaining to a height of 7 to 8 feet. Foliage dark green, healthy, and has been immune to attacks of leaf hoppers. Winner in the class for the largest dahlia in diameter, at the 1927 Trenton, N. J., Show. Tubers, each \$10.00. Plants, each \$5.00.

- ISLAM PATROL.** Dark velvety scarlet, tipped and flushed with gold, a gorgeous variety; this will be among the prize winners. Tubers, \$2.50. Plants, \$1.25.
- "JEAN HARE".** (F. & M.) A distinctive Exhibition Hybrid Cactus unusually odd in its formation and possessing distinctive charm. In the earlier stages of bloom the color is a beautiful golden yellow; as the flower matures this color is superseded by a gorgeous apricot buff, while the outer row of petals show a golden bronze coloring. This flower attracted an unusual amount of attention both in the field and on the show table. A splendid autumn-colored dahlia that has won its meed of praise both for size and beauty. Center of flower lighter in shade and tips of petals slightly tinged with gold. An extremely early and free bloomer, yet easily attaining exhibition size. Flowers borne on slender, stiff, black stems, medium to tall habit of growth, dark green foliage. Tubers, \$5.00. Plants, \$2.50.

- MARION BROOMALL.** Pink and white seedling from Gladys Sherwood, it is more cactus in shape than its parent, with better stems and habit, and a very free bloomer. A grand flower. Tubers, \$2.50. Plants, \$1.25.
- MIRAFLORES.** White, tinted violet-pink. The petals are long straight and rather narrow. The flowers are 8 inches in diameter without disbudding and are borne profusely on fine stems, this variety is distinct. There is nothing like it. Tubers, \$2.00. Plants, \$1.00.
- MARTHA KEMP.** (H. C.) This is a very refined and beautiful dahlia. The color is a warm buff, shading to apricot yellow at base of petals. Flower is full eight inches in diameter and 6 inches deep, and about the best keeper, both on the plant and when cut, of any dahlia I know, the blooms usually lasting in good condition for a week or longer, after they are full blown. Plant is a strong vigorous grower, reaching a height of six feet and over. Tubers, each \$10.00. Plants, each \$5.00.
- MY MARYLAND.** (Downs) This exhibition Hybrid Cactus is of a decidedly unique coloring, a blending of unusually delicate pink with the faintest suggestion of lavender, the pointed petals whorl and twist in such a manner as to blend the two colors. There are pinks and there are lavenders, but this flower is in a color class of its own. Excellent stems and leathery foliage. Awarded the Maryland Dahlia Society Gold Medal in Atlantic City, hence its name. Also awarded the Garden & Home Builder's Achievement Medal. First prize at A. D. S. - ROYCROFT.** (Cactus) One of the spiky dahlias, almost star shaped, and of an extremely odd and striking color, best described as cinnamon buff, deepening to tawny russet in the center. Of large size, excellent form, petals rolled to tips and never showing an open center to the end of the season. One of the first to bloom and the low-growing bushes always show a mass of perfect flowers until frost. Foliage is unique, inasmuch as it seems to be absolutely insect proof. - TALISMAN.** (B. B.) If you are looking for a new combination in autumn tints here it is. This big full hybrid cactus has a brownish red color, with a reverse of tan, the petals are long and many incurve slightly and open at the tips showing plainly the tan at the back. The center is also tan. Excellent stems. Tubers, \$2.00. Plants, \$1.00.

Choice Named Varieties of GLADIOLI

Our customers will note in this issue many new varieties that we have tried out in our gardens and found to be worthy acquisitions. It is our practice each year to obtain plantings of the newer creations in order that our many visitors may have the opportunity to view them while growing in our fields.

CARE AND CULTURE OF GLADIOLI

Do not plant too early, as nothing is gained by planting before the ground is warm. If your soil is heavy plant four inches deep, if light and sandy, six inches is better. Place the bulbs four to six inches apart. Place the bulbs in a well worked trench in zigzag rows, and cover at first about three inches, when shoots begin to appear, work balance of dirt into the trench. At all times keep the soil loose. If exhibition blooms are wanted Sheep Manure or Fertilizer should be worked in around the plants when hoeing.

In the Fall dig the bulbs as soon as the leaves turn yellow. Cut stem off half an inch above bulb. Spread bulbs out in the sun and dry thoroughly before storing. Store in a cool, dry cellar.
